About Me

I am a strategic thinker and motivated individual with problem solving and teamwork as my core competencies with a great attention to detail and creating products with good user experience leading to product growth.My mission is to discover new ways of human/technology collaboration, making sure every voice is heard.

My Experience

May 2023 - DEC 2023
Web developer

As part of my final year project, I developed a pharmacy management system in laravel -php that shows the analysis of drugs sold and purchased and also gives notification on expiry and stockouts of drugs,payment is also done and an a receipt is generated. Daily and monthly invoices are also generated.

JUNE 2022 - DEC 2022
Web Developer

During my training on PHP on HNG program, I developed a bursary management system for a constituency where students can request for a bursary and they are allocated. Other members of the constituency can also donate funds to the bursary kitty or sponsor a kid through school on the system.

JUNE 2022 - DEC 2022
UX designer

I volunteered with a team of 45 designers where I designed prototypes and wireframes for the spaceyaTech mentorship website. I used figma to create user stories,personas, wireframes and also do both direct and indirect competitve analysis.

MAY 2021 - AUG 2021
Researcher and Community engagement

Volunteered as a researcher for Shofco in Mathare where we discovered most young girls were not in school and I was part of the team that sensitized the community on girl child education and even helped in admission to Shofco school.

Aug 2022- November 2022
Open source contributor

Omdena/Nairobi local chapter

Selected as one of the 51 contributors to work remotely on a project titled 'Using AI/ML to tackle climate change' I helped in providing research papers, reading and creating a synopsis for the machine learning engineersto work on the valuable data in creating models. I also participate in hosting the models on AWS.
